

Your physician has given you the option to order Cold Therapy for your Injury or Surgery. Cold Therapy is not covered by insurance carriers and not covered by Medicare.

To order the cold therapy your physician has recommended, visit www.surgicalcoldtherapy.com. You must type in the website and not just search the company name.

You may contact (828) 729-2934 for online customer support.

The IceMan® CLEAR³ is a post-operative device that uses a cooler, pump, ice and water to treat swelling and pain. The IceMan® CLEAR³ utilizes a patented semi-closed loop circulation system, which maintains consistent and accurate temperatures for your therapy. The therapeutic effect of continuous cold is a useful method for reducing the symptoms of pain and swelling while providing comfort following surgery to help accelerate rehabilitation.

The DuraSoft product can effectively penetrate surgical dressings to decrease pain and edema. The inserts can be frozen and exchanged to provide cold therapy. The ultra-wick antimicrobial nylon wraps and elastic straps provide a universal fit and effective compression.
