

JRF ORTHO

CARTILAGE RESTORATION:

Keys to a Successful Allograft
Transplantation Experience

HISTORY

JRF Ortho has been recognized for their unequaled standard of customer care and for creating innovative solutions. As the largest provider of specialized orthopedic allografts furnishing surgeons with exceptional products, **JRF Ortho is the quality standard that you can depend on.**

RELATIONSHIP

Strong partnerships enable JRF Ortho to better supply surgeons with the most widely available viable cartilage solutions with over 20 years of superior clinical outcomes. Our allografts are processed by AlloSource® and Solvita™ with local support and instrumentation provided by Arthrex®.

WHY JRF ORTHO

JRF Ortho is the industry leader who focuses on:

EXCEPTIONAL PRODUCT QUALITY AND SAFETY

Over 25,000 fresh osteochondral & meniscus allografts have been implanted with no confirmed disease transmission.

INNOVATIVE SOLUTIONS

JRF Ortho works with orthopedic surgeons to develop novel techniques for allograft joint repair.

SUPERIOR CUSTOMER CARE

An independent survey found that JRF Ortho embodies the values of trust, respect, appreciation and integrity. Our customers are proud to be working with JRF Ortho and have a passion for accomplishing the joint mission.

JRF ORTHO IS **REDEFINING THE STANDARD**
FOR ALLOGRAFT JOINT REPAIR.

SINGLE STAGE PROCEDURE THAT FITS INTO YOUR SCHEDULE

Tell us what type of allograft you want and when you want it

STEP 1: CHOOSE YOUR ALLOGRAFT

Option 1: Precut Fresh OCA Core

- No size matching, no wait

Option 2: Specific Allograft Request

- What are your graft match specifications?
 - Matched or Non-orthotopic?
- More matching variables = less options

STEP 2: CHOOSE YOUR TIMING

Option 1: Pre-scheduled surgery date

- Specific date available for some types of grafts

Option 2: Target date range

- i.e. Holiday breaks, end of year

Option 3: First available

- Requires ability to have surgery with less than 2 weeks' notice

INCREASE PATIENT AWARENESS

To maximize graft viability, osteochondral allografts have to be transplanted within 28 days. Educating patients on allografts helps to ensure they are available when a graft is matched. *When a graft match is offered and not accepted, the gift of donation will likely go to waste.*

EFFICIENT GRAFT MATCHING

The more information that JRF Ortho has about your patient, the more accurate we can be in offering an acceptable graft. This saves you time by optimizing graft offers.

LATERAL CONDYLES PROVIDE A GOOD SOLUTION FOR MEDIAL DEFECT REPAIR SURGERIES.

Research indicates that restoration of defects up to 25mm in diameter can be accomplished using any first available condyle¹. The topography and larger size of lateral condyles make them the preferred solution to restore larger or multiple core defects².

To this point, lateral condyles are more readily available and allow the surgeon to:

- Get the patient's repair done sooner allowing less time for the defect to grow
- Schedule surgery rather than rush: Allowing for better planning between surgeon and patient
- Perform procedures for larger lesions seeing that a lateral condyle is larger; therefore, an excellent option for multiple cores, Snowman, Mastercard, or BioUni® OATS*

High-volume OCA transplant surgeons have long used lateral condyles to restore medial defects to get grafts faster.

ONLINE INSURANCE TOOL

Do you have trouble getting insurance authorizations for allografts? Take advantage of this online tool to expedite osteochondral allograft insurance approvals.

This is a streamlined, step-by-step tool providing you the resources and support needed to obtain insurance approval.

KEY POINTS:

- One-stop resource for pre-authorization materials
- Payor specific policy requirements, template letters of medical necessity, and supporting literature
- Sort by insurance company, state, and diagnosis
- Save time seeking insurance pre-authorization for OCAs

THE JRF ORTHO DIFFERENCE

JRF Ortho has a storied history for over a decade creating innovative solutions and being recognized for unequalled standards of customer care. Since 2006, JRF Ortho has become the largest fresh graft organization in the world. We continue to work with surgeons and other partners to help develop novel techniques for allograft joint repair.

Our mission is to improve quality of life through innovative solutions for allograft joint repair.
